LETTER FROM THE CHAIRMAN

The American Conservative Union Foundation’s Center for Legislative Accountability is proud to present our Ratings of Rhode Island for 2021. Like our Ratings of Congress, ACU Foundation’s Ratings of the States are meant to reflect how elected officials view the role of government in an individual’s life. We begin with our philosophy (conservatism is the political philosophy that sovereignty resides in the person) and then apply the proper role of government (its essential role is to defend Life, Liberty and Property).

The Left has stormed our nation’s corridors of power to take control over the lives of every American. Now, they have set their sights on the states, freedom’s last line of defense.

President Lincoln once said, “America will never be destroyed from the outside. If we falter and lose our freedoms, it will be because we destroyed ourselves.” The Left’s agenda dismantles the vision of our founders when they pledged their lives, their fortunes, and their sacred honor.

We hope these Ratings will empower each and every American to hold their officials accountable and to rally behind the conservative champions who defend our freedoms in statehouses around the country.

Matt Schlapp
Chairman
American Conservative Union Foundation
ABOUT THE CENTER FOR LEGISLATIVE ACCOUNTABILITY

The Center for Legislative Accountability (CLA), an initiative of the American Conservative Union Foundation (ACUF), is the premier organization for holding lawmakers accountable. The CLA produces the longest-running conservative congressional scorecard and our state program is the only one in the nation that scores all 8,000 lawmakers in the 50 states across every policy area. In addition to ACUF’s Conservative Political Action Conference (CPAC), the largest gathering of conservatives in the world, the CLA develops conservative policy solutions and educates everyday citizens and activists on the proper role of government. In 1971, ACUF launched its Ratings of Congress to provide a comprehensive evaluation of the voting records of every Member of Congress. The Ratings quickly became considered the “gold standard” and over the following decades have been utilized by activists, voters, academics and elected officials to determine which lawmakers best adhere to conservative principles. In 2011, these Ratings were expanded into state legislatures as part of a five-state pilot program. By 2015, Ratings of the States grew to include all 50 states and all 99 legislative chambers.

Today, the CLA annually analyzes over 105,000 pieces of legislation to issue scores for all of America’s federal and state lawmakers and presents awards to lawmakers who score 80% or better in recognition of their conservative voting records.
METHODOLOGY

The CLA’s Ratings of Congress and the States illustrate how elected officials view the role of government in an individual’s life. When determining a position on a particular issue, the CLA begins by defining conservatism: the political philosophy that sovereignty resides in the person. Then, we apply the founders’ belief that the proper role of government is to protect Life, Liberty and Property.

In order to depict how closely a lawmaker adheres to conservative principles, the CLA selects from the full spectrum of issues relating to the economy, culture, national security and government integrity. Some key areas include taxation, spending, education, labor, licensure, regulation, environment, life, free speech, Second Amendment rights, foreign aid, defense priorities and global organizations, including the United Nations. All congressional and state analyses are conducted after the adjournment of a legislative session to ensure that no issue is neglected.

Each lawmaker is evaluated on a zero to 100 scale, with a score of 100 representing a voting record that is perfectly aligned with conservative principles. Officials who earn a score of 90% or higher are presented with the CLA’s highest honor, the Award for Conservative Excellence, while those who earn a score of 80% or higher, but less than 90%, are presented with the Award for Conservative Achievement. Additionally, any lawmaker who earns a score of 10% or lower qualifies for the ACUF’s Coalition of the Radical Left.

ANNUAL METRICS

To determine legislative rankings, the CLA annually evaluates over 105,000 bills that were introduced in Congress and every convening state legislature running from January 1 to December 31. Of those bills, the CLA ultimately selects roughly 2,000 pieces of legislation that best illustrate how elected officials view the role of government in an individual’s life. The CLA calculates individual scores for a total of nearly 8,000 federal and state lawmakers based on over 157,000 votes cast on the 2,000 bills selected. The CLA provides a score for each legislative chamber, which is based upon the average scores of all members within that respective chamber. A legislature’s overall score is calculated by averaging each state’s two legislative chambers together in order to better reflect the differences in political power between the chambers. (The exception being Nebraska, the nation’s only unicameral legislature comprising a single legislative chamber, on which the state’s overall score is based.)

In joining TCI, state elected officials would be abrogating their legislative responsibilities, and instead, empower the TCI to act as an unaccountable policymaking organization. If enacted, consumers would have little recourse in opposing the TCI’s rules. ACU is especially disappointed to see the Alliance for Automotive Innovation fall trap to the Left’s Woke ideology and support this bill. ACU opposes the TCI and its attack on traditional, cost-effective automobile and transportation and the freedom it brings to citizens and opposed this bill. The Senate passed the bill on July 1, 2021 by a vote of 31-6 but the bill was vetoed by the governor.
